

Model: Kalymnos

Aluminum Heavy duty umbrella, with shaft and 8 ribs made of aluminum.

It is constructed with inox double pulley system, and inox screws.

The shaft is $\Phi 48\text{mm}$, and rib profile 15x30mm.

It is constructed with “central easy repair” system, that helps substitute any rib easily.

Special condition: We use only ULTIMATE NANOACRYLIC fabric for resistance to the rain and to the sun, since the fabric is treated with nanotechnology and lowers temperature up to 8 degrees. The fabric is best for South Countries with a lot of heat.

Model: Kalymnos

Iron Galvanized fix base.
See that we install 2 safety screws
for better balance and safety.

See both runners (above and below).
They are designed with “easy repair”
system that helps change
any damaged rib, very easily.
From now on, at least model
Kalymnos will be designed and
constructed with this
excellent “easy repair system”.

A beautiful base with “hidden
wheels” and special rod
that moves the base easily.
The rod can be easily
uninstalled and stored.

Cement base with metal handles
for easy transportation.
The tube comes separately so that
the base can be carried or stored easily.

Cement base in black color.
